DEW COLD ICE-LINED FREEZER

FOR UNINTERRUPTED TEMPERATURE RETENTION

**When it comes to storing valuable vaccines,
there is no room for compromise.**

DEW-COLD™

Protect Your Vaccines with Confidence

The DEW COLD Ice-Lined Freezer has been meticulously engineered to maintain a consistent temperature, providing optimal protection for vaccines, medicines, and other temperature-sensitive products.

With advanced technology and top-quality construction, you can trust the DEW COLD Ice-Lined Freezer to deliver reliable performance around the clock.

DEW COLD ICE-LINED FREEZER

Key Features

- **PUF Insulation:** Excellent thermal efficiency, ensuring your vaccines remain at a stable, safe temperature.
- **Energy-Efficient Compressor:** Reduces power consumption while providing high performance.
- **Rupted Brand Fans:** Ensures uniform airflow for condensation prevention.
- **SS304 Stainless Steel Interior:** Hygienic, easy to clean, and durable with superior corrosion resistance.
- **Reliable Temperature Control:** Maintains precise temperature between +2°C to +8°C, ensuring the safety of your sensitive products.
- **Up to range of 24 to 40* Hours Cold Retention:** Holds temperature when power frailer (with door is closed.)

* It may vary based on the ambient and storage place used by the locations.

Product Specifications

- **Vaccine Storage Capacity:** Available in sizes from 100L to 300L
- **Ice-Pack Freezer Capacity:** Options ranging from 40L to 120L
- **Cold Life Without Power:** Holds cold for 24-40* hours
- **Lockable Lid:** Ensures tight sealing and security
- **Interior & Baskets:** Two wire or SS 304 baskets for optimized storage

Materials

- **Outer:** Polyethylene or Galvanized Steel
- **Interior:** Polyethylene or SS 304 Grade
- **Insulation:** High-density, CFC-free polyurethane insulation (80-100mm thickness)
- **Voltage:** 220-240 VAC, 50/60 Hz
- **Refrigerant:** R134A or R600
- **Easy Service Access:** For efficient maintenance and servicing.
