

EL Shaddai Refrigeration and Air Conditioning Pvt Ltd

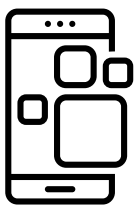

vaccine carrier

Your Trusted Companion for Vaccines & Biological Sample Transportation

BASED MONITORING

The Vaccine Carrier is a cutting-edge, portable refrigerated box designed to revolutionize the way Vaccines and other biological samples like blood and its components, serums, Viral Cultures and other test samples are transported from collection points to laboratories. Crafted with precision and innovation, this essential tool caters to the needs of pathology labs, test laboratories, and various healthcare facilities. Vaccine Carrier has been designed in accordance with WHO-PQS E003.

DEDICATED ANDROID / OS APPLICATION

Stay in control at your fingertips. vaccine carrier comes with its own user-friendly application, providing seamless management of the carrier's settings, real-time monitoring, and ensuring a streamlined user experience.

Key Features:

LED and Buzzer Alerts

Temperature Indication

Continuous operation when plugged in

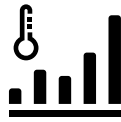

Active Cooling

Easy and fast charging

IP56 Rated - dust & water Resistance

Temperature Control

Maintain the integrity of your blood samples with vaccine carrier advanced temperature control system.(+2°C to +8°C). Ensure that samples are preserved at the optimal temperature during transit, safeguarding the accuracy of diagnostic results. Freezing Option also available (-15°C to -25°C)

GPS Tracking

Experience heightened security and real-time visibility of your precious cargo. The vaccine carrier is equipped with GPS tracking, allowing you to monitor the location of your samples throughout their journey, providing peace of mind and ensuring timely delivery.

Extended Temperature Holding

Rely on vaccine carrier to keep your samples at the desired temperature for more than 12 hours. This extended holding time ensures that samples remain viable and suitable for testing upon arrival at the laboratory.

12V Compatibility

Stay connected and powered up on the go. The vaccine carrier is compatible with 12V power sources, ensuring versatility and convenience, especially during transportation.

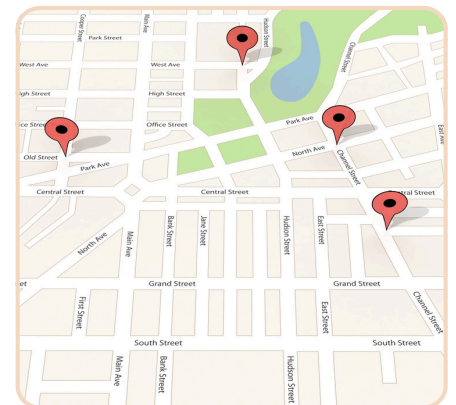

Lightweight, Portable and Shoulder-Carriable

Experience unparalleled ease of transportation. The vaccine carrier is designed to be lightweight and can be comfortably carried on the shoulder, allowing for hassle-free movement between collection points and laboratories.

Energy Saving and Eco-Friendly

Contribute to a greener future with vaccine carrier. Our carrier is not only energy-efficient but also eco-friendly, minimizing environmental impact while maximizing efficiency in sample transportation.
